Bigdbiz is one of the reputed Software and App development company. Over past 8 years we are providing uninterrupted and high valued software and app services. Bigdbiz helps customers to do business better by leveraging our industry-wide domain expertise, technology expertise and to develop leading edge software solution.

1

# RESTAURANT MANAGEMENT SOFTWARE

# Preface

- Bigdbiz Restaurant POS Software is a cloud-based point-of-sale system for restaurants, cafés, bars, bakeries, food trucks, ice cream parlors, bistros, and cloud kitchens.
- Features include Tablet ordering, Happy Hours, Table & Reservation, Billing, Parcel, Bar & Kitchen Management, Inventory Management, Vendor Management, CRM (customer relationship management).

# What does Restaurant Management Have?

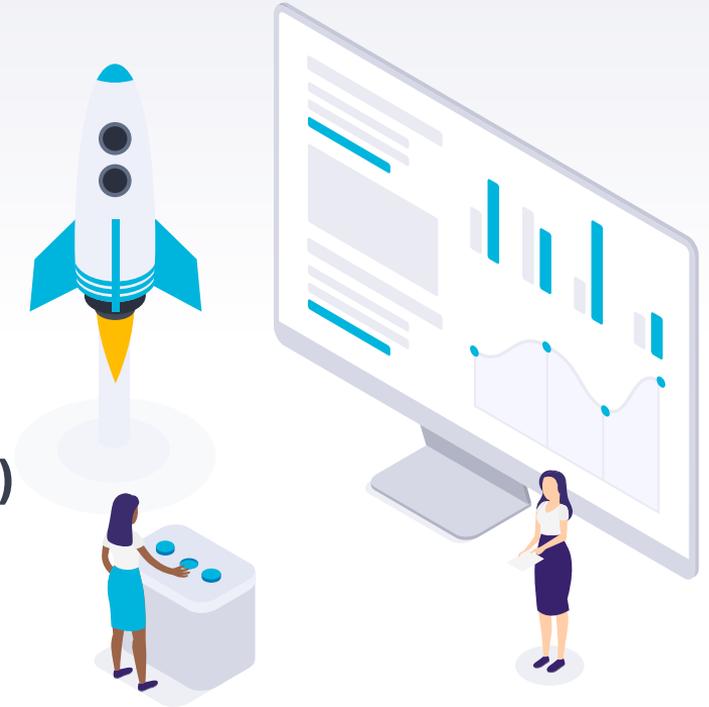

# Benefits

- ▶ This restaurant billing software solution efficiently maintains your tables.
- ▶ You can define how many tables your restaurant has and how many people can fit at each table.
- ▶ Print your Sales Invoice and Order Slip documents simultaneously on two printers.
- ▶ View your goods by category and use the search filters for quick results.

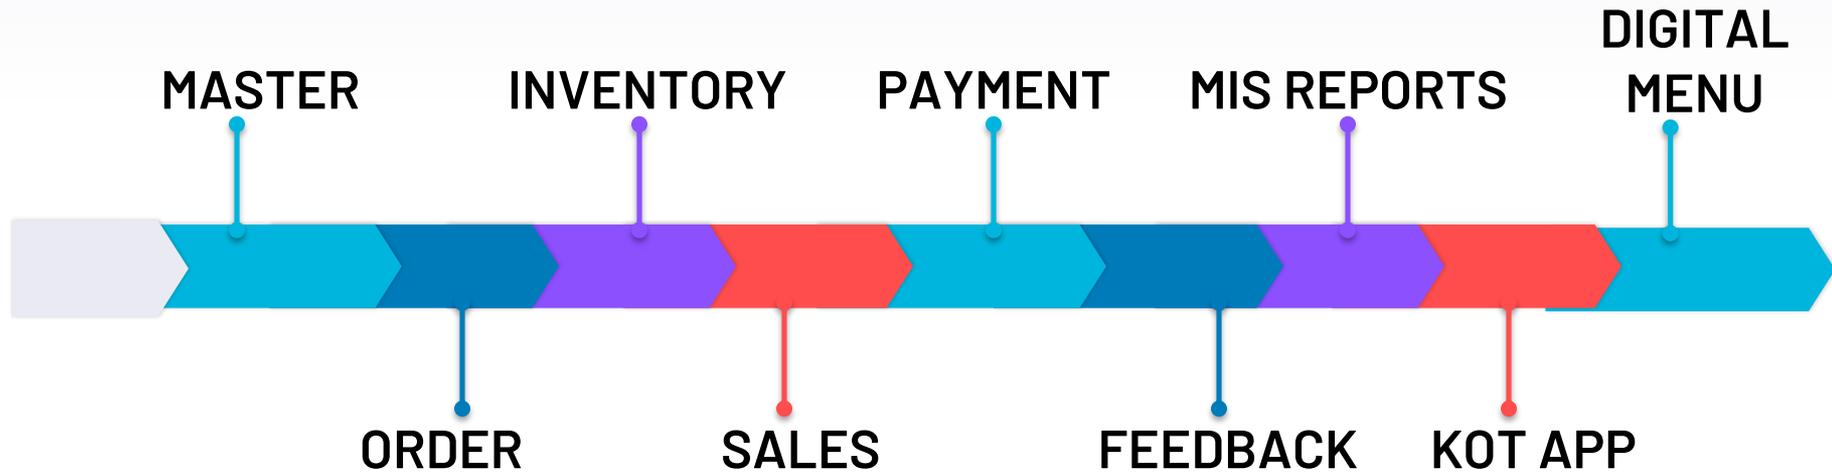

# FEATURES

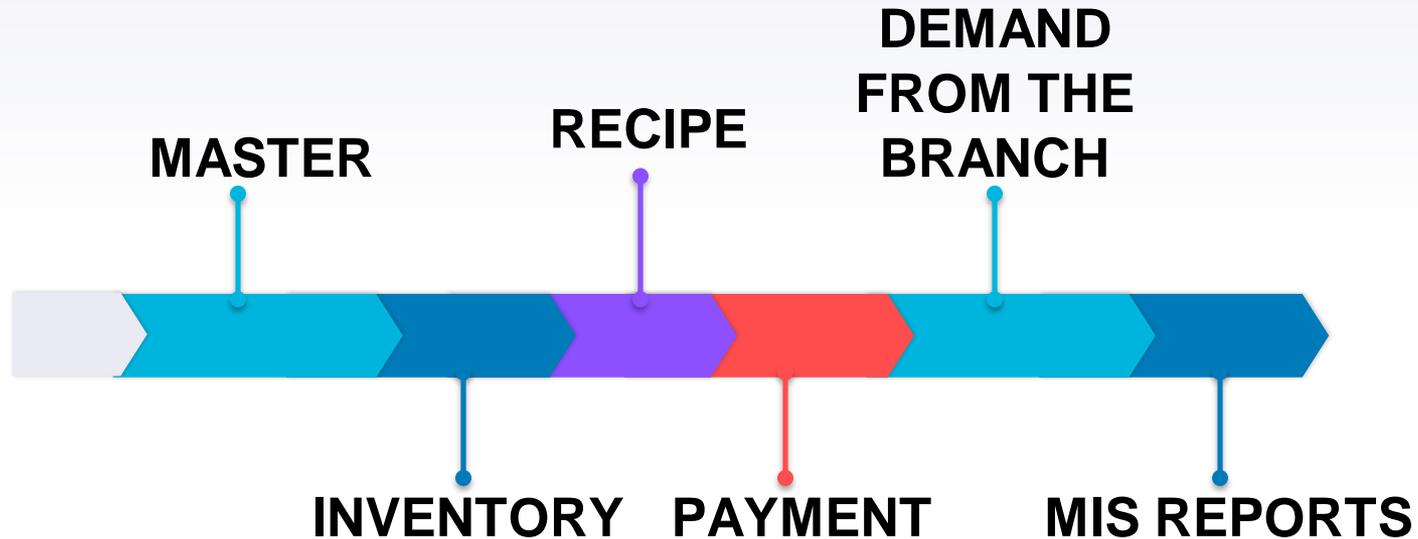

- ▶ **Table Management**
- ▶ **Billing POS**
- ▶ **Kitchen Order Tokens**
- ▶ **Control of theft and wastage**
- ▶ **CRM (Customer Relationship Management)**
- ▶ **Inventory Control**
- ▶ **Recipe Management**
- ▶ **Cloud Management**
- ▶ **Feedback Form**

# BILLING POS MODULE

# KITCHEN/PRODUCTION MODULE

# Roles - Outlet/Branch

## Administrator

- Monitor the store's daily sales and orders.
- You may also keep track of stock requests, shipments, and returns with justifications.
- The administrator may be the general manager or director.
- He has complete access to the master settings, including the ability to add Group/Items and tables.

## Billing Employee

- ▶ The billing person can make detailed notes about cake orders and produce invoices based on those notes.
- ▶ You can also mark any payments or advances made in relation to the order.
- ▶ Inquire about and get stock from production.
- ▶ Take note of the amount you paid or spent at the shop.
- ▶ Change a cash payment to a credit card or vice versa
- ▶ KOT Sales with table management (Android app).

# Roles - Production/Manufacturing Unit

## Administrator

- The administrator has complete access to the master settings, including the ability to add Group/Items, tables, Branch details, Contact details, and ledger settings.
- He can use the Low-Stock Alert to manage the purchasing of raw materials and the Inventories to track stock requests and inventories.
- Track communications between the outlet and the manufacturing unit.

## Production Employee / Chef

- ▶ The chef can record the actual output of an item and the cause of any deviation based on the predicted execution, and send the needed stock from the store based on its accessibility.
- ▶ A low stock signal might be given to the cook.
- ▶ Set the recipe book, and then carry out the instructions in it.

# ► Screenshot - dashboard

The screenshot displays a POS System dashboard with a dark blue header and a light blue main area. The header includes a navigation menu with options: MASTER, ORDER, SALES/INVENTORY, STOCK ENTRY, REPORTS, STOCK DAY CLOSE, and SIGN OUT. A user profile section shows 'Welcome | raja | Branch | Billing'. The main content area is titled 'Welcome To POS System' and features three summary boxes: 'Total Sale's', 'Total Orders's', and 'Order Delivery's Details'. Below these are six red circular icons with labels: 'New Delivery', 'New Bill', 'New Order', 'New Product', 'Sales Reports', and 'Check Stock'. A vertical 'ACTIVISION' logo is on the right side.
