

# BIGDBIZ SOLUTIONS

WELCOMES YOU ALL

Bigdbiz is one of the reputed Software and App development company. Over past 8 years we are providing uninterrupted and high valued software and app services. Bigdbiz helps customers to do business better by leveraging our industry-wide domain expertise, technology expertise and to develop leading edge software solution.

1

# TEXTILE PRODUCTION MANAGEMENT SOFTWARE

# Preface

- **Bigdbiz Textile ERP Software is the best ERP Garment Software for the textile and apparel sector.**
- **It has the precise capability needed to handle your most urgent technical and business requirements.**
- **Includes all of the necessary components for producing spinning, weaving, warping, and grey cloth.**

# Textile Industry Challenges

Textile sector faces numerous difficulties in managing costs, controlling inventories, and meeting client demand.

- Integration
- From One to Many
- Traceability

- Management of Inventories
- Quick delivery
- Reporting

Automated Textile ERP software can provide improved visibility and insights into core business activities. Bigdbiz is the best ERP for the textile and garment sector

# Benefits

- ✓ Targeted IT Costs
- ✓ General Perception
- ✓ versatile modularity
- ✓ reduces lead time
- ✓ superior processing efficiency customer service
- ✓ Improvement of Security Sources and Data Quality
- ✓ Improvements to Collaboration and Workflows
- ✓ Regular Business Processes
- ✓ supports both the buying and the production cycles
- ✓ Regulatory Compliance Made Simple
- ✓ more effective supply chain management
- ✓ Outstanding Scalability
- ✓ Planning and reporting improvements

# Features

- Reasons for Track Fabric Damage / Width Shortage
- Alert for Low Stock (Raw Material) via SMS or email
- Track the Stage or Current Status of a "Lot"
- Increase your profit and efficiency growth while decreasing labor costs and paper work
- Multiple branch/unit support
- Can reduce production and fabric waste

# Roles - Production

## Administrator

- The administrator can be Director/General Manager.

# Testimonials – Jasmine Towels Pvt Ltd

Jasmine Towels is a reliable name for textile exports and has built a clientele in country like the USA. They have two state-of-art factories located at Madurai and Sivagangai. The foundation for the start of Jasmine Towel was laid way back in 1998.

## Business Challenge

Even with a strong and reliable crew surrounding them, they were using separate softwares to manage each individual process, some of which were stand-alone systems and maintaining the report is complicated. So tracking of workers and work process were complicated. Their productivity needed to be raised, and waste had to be reduced.

## Solution

Bigdbiz developed them tailor made software that helped to track all the production process in same system and manage all day-to-day activities. The ERP supports third party tool integrations. They use our software effectively over 2 years and achieve productivity

# Testimonials – Affordable Exports

Since 1986, Affordable Exports located at New Delhi has consistently represented and delivered quality garments and apparel. The brand's core values are effortless style, sincerity, and affordability. The tagline of the business, "Designed to Design Fashion for You," reflects its conscious, modern, and focused approach.

## Business Challenge

They struggled to integrate the newest technology with an outdated system to improve overall performance, making it difficult for them to access their order process details, reports and alert messages to customers about order process data

## Solution

Bigdbiz Apparel has created a mobile app that gives them access to an apparel production management system that includes vendor ordering system, an admin app (available for both Android and iOS), and the ability to track process specifics. The software was created from scratch and modified based on their needs.

# Testimonials – PT Gokak

Gokak spun yarn exports go to about 25 different countries worldwide. They use its 65,000 ring spindles and 1320 open end rotors to create a variety of spun and open-end yarns. The name Gokak comes from the main firm's headquarters in Southern India.

## Business Challenge

The workforce at PT Gokak Indonesia struggled with incorrect data inputs via manual method, and tracking the "LOT" was a laborious process. The company employs its 65,000 ring spindles and 1320 open end rotors to produce a mix of spun and open-end yarns. Their productivity needed to be raised, and waste had to be reduced.

## Solution

An automated weight tracking system with a barcode was offered by Bigdbiz. This has led to an improvement in manufacturing efficiency, cost savings and on-time delivery. The company has also been able to track the work process and reduce wastage through the app's tracking feature.

# Testimonials – JP Exports

JP Exports, a prominent ready-made retailer in Chennai, is located in Washermenpet. They market the shirts and pants they produce on-site. They promote other apparel brands in addition to selling their own merchandise at other stores.

## Business Challenge

The production of fabric and garments is done manually using a number of lengthy processes in the textile industry. As a result, they are unable to oversee the working process and have difficulties with productivity, inventory control, accounting, damage, theft, and internet marketing. They are unable to keep track of the liabilities for current stock and unpaid bills.

## Solution

Bigdbiz has provided them with an Apparel Production Management System with B2B support to track process details. They found our software to be helpful in tracking inventory and processes for both internal operations and contract workers. Integration of the full production management, accounting, barcode, and e-commerce package
